STG - (A) United States patent
AB - An inverter by pass safety switch for rerouting electrical power either through or around
AC variable frequency inverter drives during electrical disturbances, thus allowing a
motor to continue operation. The switch works in a mechanical fashion, and comprises a
contact block containing electrical contacts and cams operably connected to the contacts
and mounted on a shaft that can be turned by an operator. The cams are shaped and
mounted on the shaft in such a way to provide a desired switching pattern when the shaft
is manually rotated.
